U.S. Army Corps of Engineers, Baltimore District, awards contract to build a Data Center at Camp Williams, Utah

BALTIMORE — The U.S. Army Corps of Engineers, Baltimore District, awarded a \$1,198,500,000.00 contract today to Balfour Beatty/DPR/Big-D, A Joint Venture to construct a Data Center at Camp Williams, Utah.

The facility will be located approximately 25 miles south of Salt Lake City on the grounds of Camp Williams, Utah, which is a National Guard training site operated by the Utah National Guard. The data center will be comprised of up to 1.5 million square feet of building space. Two Corps of Engineers Districts, Baltimore and Sacramento, will manage and oversee the construction of the project.

The center will consist of 100,000 square feet of raised floor data center space and more than 900,000 square feet of technical support and administrative space. Support facilities include an electrical sub-station, a vehicle inspection facility and visitor control center, fuel storage, water storage and a chiller plant. The center will also be a Leadership in Energy and Environmental Design certified project.

The U.S. Army Corps of Engineers is a full-spectrum engineering force of Soldiers and civilians dedicated to serving the Armed Forces and the Nation with innovative and effective solutions to a broad range of engineering challenges.
